* Unduplicated count means that each victim is counted only once even if the victim meets more than one criteria, specific data variable, or service. This number will show the total number of continuing victims served that have continued to receive services outside of the first reporting period where they were counted. Each continuing victim will only be counted **once**, even if served under multiple funding sources.

** Ongoing means services that are provided to current victims that are not counted under the new primary or secondary metrics.
